

Your Family Sign-in

1. Determine which family name you are connected to and include that information in your request for a log- in. Also include what you want the login alias to be.
2. You will receive a confirmation email which will confirm your details.
3. This log-in may be used by all members of your immediate household including children. It gives you the ability to edit and add details and pictures to your family. High school aged children can be very useful in doing this.
4. You can also print family charts and trees from the on-line program.
5. Contact the site administrators (members of Three Lakes Genealogical Society). We welcome suggestions as well
6. The names of living people (has no death date or status) are hidden except for administrators of that family.
7. If your family is not yet on the tree – we will create a place for it.
